Education

UW Madison, *May 2028*

- Bachelor of Science in Computer Sciences, Bachelor of Science in Statistics · GPA: 3.9

Relevant Coursework

- CS300, CS400, STAT240

Professional Experience

Crew Manager *Aug 2020 - Aug 2024 @* **Culver's**

- Led team in providing exceptional customer service by serving orders swiftly and efficiently
- Managed incoming phone complaints promptly and resolved issues to ensure customer satisfaction
- Developed and maintained work schedules for employees, optimizing staffing levels for operational efficiency
- Ensured smooth flow of operations by managing the line during peak hours
- Maintained cleanliness and sanitation standards in restrooms to uphold company hygiene protocols

Lot Manager *June 2023 - August 2023 @* **Nissan**

- Organized vehicles in the lot efficiently to maximize space utilization
- Cleaned and detailed purchased vehicles to uphold quality standards and enhance customer satisfaction

Projects

Black Scholes Option Pricing Visualizer *Dec 2024 · Technologies:* Python, Plotly, Streamlit

- Developed a user-friendly reactive European option pricer graph based on user input
- Implemented the Black-Scholes option pricing model
- Utilized Python, Plotly, and Streamlit to create interactive visualization and calculation features

AI News Sentiment Scraper/Analyzer *Jan 2024 · Technologies:* Python, OpenAI, BeautifulSoup

- Developed an AI powered web scraper to autonomously browse news sites and harvest the information
- Fine-tuned an AI model specifically towards financial news sentiments

Personal Portfolio Website *Dec 2024 · Technologies:* React.js, React-Dom, TailwindCSS

- Developed a reactive minimalist website utilizing React.js and React-Dom to showcase personal projects
- Implemented a dynamic CSS carousel for displaying project portfolio efficiently

Technical Skills

Programming Languages: Rust, Python, Java, Luau

Web Technologies: React.js, Next.js, Flask, HTML/CSS

Development Tools: Git, Docker, VS Code, JetBrains

My Interests

Machine Learning & AI

- Neural network architectures, optimization, and implementing deep learning models for real-world applications
- Exploring statistical learning theory and the mathematics behind machine learning algorithms

Data Science & Analytics

- Statistical modeling and inference for large-scale datasets
- Data visualization and extracting meaningful insights from complex data structures

Software Development

- Full-stack development with a focus on scalable applications and efficient backends
- Open source contributions and collaborative coding projects
